

Dear Partner Merchant,

We are pleased to inform you that our Jetlaser face is improving the shade to a higher whiteness level.

All other main technical properties will remain the same, meaning substance, caliper, opacity, printability and of course, our quality delivered from layflat point of view. With the new whiteness level we will be at the highest levels in market.

The change in the range is forecasted to take effect during May'10, and it will be carried out gradually as our old stocks run out. Your Customer Sales responsible will inform you about the new EAN codes. Our updated product range, technical information sheets and other resources are also available in our Raflaweb

We kindly ask you to forward this information to the persons concerned in your organization.

Best Regards
Mastertac Sheetstock Sales and Marketing

MASTERTAC TECHNICAL INFORMATION

19/01/2010
