

Master[®]tac

The smart choice.

It's here! Introducing our redesigned Master[®]tac Digital Range

A wider, redesigned Digital product range is now available in low Minimum Order Quantities – helping you meet even more of your customers' needs with minimal commitment to stock.

New products with scoring and back-print

We've expanded our Digital Range with new paper and filmic products. Options include our precision back-scoring to make these materials applicable for a wide range of uses. Our back-print supports brand recognition and repeat sales of top-quality products.

Distinctive packaging for a perfect user experience

Our new Digital Range boxes feature a pull-out drawer, which allows users to slide the sheet stack forward for convenient access. Rather than have half-used sheet stacks and boxes piled up around the workplace, the new design is almost part of the furniture and helps keep sheets in perfect condition.

Reduced MOQs with the new MULTI-REFERENCE Service

We've reduced the Minimum Order Quantities for our digital sheet products to just 1000 sheets. With our MULTI-REFERENCE service, you can choose up to 6 products for each 6,000-sheet delivery pallet. This means you can, for example, order 2000 sheets of one product, together with 4 other products at just 1000 sheets each. With minimal stock commitment, you can become a one-stop shop for more and more customers.

Please contact your sales area responsible or your Customer Service for further information about the new Digital range and specific Multi-Reference service details.
